## About Decoding a Montana Vehicle Title, Registration and Mail Renewal Card

This publication will prove useful for citizens of Montana wishing to decode information on a Montana certificate of ownership (title), motor vehicle registration renewal card or registration receipt.

This guide also serves as a reference for users of the Vehicle Record Search online service. Use of vehicle records is subject to the limitations described in the Montana Driver Privacy Protection Act -- Sections 61-11-501 through 61-11-516 of the Montana Code Annotated.

A vehicle record search may include many sections and/or subsections. Any information not provided in response to a search indicates that the Motor Vehicle database does not have the information to complete those sections of the record. Any field visible on screen that is not referenced is an obsolete field and no longer used by the Motor Vehicle Division.

Standard date format on the report is MM/DD/YYYY.

Title and Registration Bureau of the Motor Vehicle Division is referenced in this guide using an acronym – TRB

## Other Pertinent Data

Additional information the Department feels is important will be noted on the Montana title and that information will be displayed.

## Title

A unique number assigned to a Montana title and printed on the certificate of title, which is used to further identify the vehicle and its record on the motor vehicle database. If a TRP was issued on a vehicle the TRP number will display until a Montana title number is assigned to the vehicle.

## Title Status

The status of a record is a valid indicator of whether a title is issued, awaiting resolution of a problem or pending activity. The most common statuses appear below. Codes for title status are only visible on the MVD database, so not detailed.

Title Status	
In-Work Converted	When converting to the current database, old titles without microfilm records were given this status. The record cannot be altered until the abstract for the vehicle is checked for validity.
Detitled	Manufactured Homes that have been changed from personal property to real property.
In Work	Represents pending activity on the record. The record remains <i>In Work</i> until the pending process is complete.
Invalid VIN	A VIN override function was used during preliminary entry by user of the MV database. If the VIN has invalid characters or other than 17 digits, the vehicle will probably need an inspection.
Issued	An In Work title becomes Issued once a certifier at the TRB accepts the title as valid. The issued status changes an owner from Applying to Current.
Junked	Vehicles or vehicle parts turned over to a junkyard are reported to the TRB. Once junked, the title number is no longer valid or active. If a vehicle is rebuilt after being junked, a new Montana title is issued.
Override	Used to override a stolen flag when action is required despite the flag.
Postponed	Vehicle information that has been entered into the database prior to registration. Once the customer completes registration, the status changes to In Work.
Stolen	Stolen flag placed by the Title and Registration Bureau.
Stopped	The Title and Registration Bureau places <i>stops</i> on records for a variety of reasons. Anyone encountering a <i>stop</i> is required to contact the TRB for resolution of the issue.
Surrendered	Montana title was surrendered to another state.

## Title Surrender Information

When the Montana title has been surrendered to another state in favor of a title in the new state and the surrender has been reported to Montana by the other state, the state and date of surrender displays.

## Title Date

The Title Date is the date the most recent Montana title was issued and accepted for print by the TRB.

## Application Date

The Application Date is the date the title process was started in the county office.

## Sale Date

The Sale Date is the date recorded for the vehicle sale.

## License Plate Information

If the vehicle is registered and has been issued a license plate, the vehicle license plate information and registration expiration date appear in this section.
